

Intensive Hands-on Two Day Workshop with Workstation Practice

Programme

Both days are a combination of lectures and periods of self study.

Gina is keen to maintain informality and so adapts to the delegates' preferences on each day; the below structure, therefore, is a guideline only however we maintain the timings in deference to the venue.

For the periods of self study at the end of Day One and the beginning of Day Two the times quoted are for information only – there is no expectation as to the length of time delegates spend in the self study sessions.

Day One

08:00	Registration opens
08:30 – 09:30	Self assessment of MDT cases
09:30 – 11:00	Lecture: Overview – current strategies and evidence base
